

# ROS

- ▶ Ros is a complete ecosystem, containing Middleware (connecting components), Libraries and Utilities
- ▶ Complete ROS Tutorials 1–6 and 11  
<http://wiki.ros.org/ROS/Tutorials>

# ROS Nodes / Topics

- ▶ Publish and Subscribe to chatter Data
    - <http://wiki.ros.org/ROS/Tutorials/WritingPublisherSubscriber%28c%2B%2B%29>
  - ▶ Amend the code to :
    - Publisher
      - Sends doubles from a Gaussian distribution (0–1) and
    - Subscriber
      - Creates a histogram of the numbers (each bin is 0.1)
      - On 50<sup>th</sup> number received shows as percentage of numbers received the numbers in each bin
    - Questions:
      - Do you need to change the StdMsg?  
refer [http://wiki.ros.org/std\\_msgs](http://wiki.ros.org/std_msgs)
      - Will you use a container for the histogram?
- 

# OpenCV

- ▶ [http://docs.opencv.org/2.4/doc/tutorials/introduction/linux\\_gcc\\_cmake/linux\\_gcc\\_cmake.html](http://docs.opencv.org/2.4/doc/tutorials/introduction/linux_gcc_cmake/linux_gcc_cmake.html)
- ▶ Exercise:
  - Can you create a histogram of grey scale image?
  - Convert color image to grayscale
  - Create a array of length 255
  - Loop though each pixel of and increment the corresponding element
  - Print on screen

# OpenCV Help

## Accessing Pixel Values

```
cv::Mat img = cv::imread("lenna.png");  
//Before changing  
cv::imshow("Before",img);  
//change some pixel value for(int j=0;j<img.rows;j++) {  
    for (int i=0;i<img.cols;i++) {  
        if( i== j) img.at<uchar>(j,i) = 255; //white  
    }  
}  
//After changing  
cv::imshow("After",img);
```

# Library

- ▶ Can you refactor your code that produces a histogram to be a library?
  - `add_library (histo histo.cpp)`
  - `target_link_libraries (demo histo)`
- ▶ <https://cmake.org/examples/>

# Using a Library – OpenCV

- ▶ Example

- [http://docs.opencv.org/2.4/doc/tutorials/introduction/linux\\_gcc\\_cmake/linux\\_gcc\\_cmake.html](http://docs.opencv.org/2.4/doc/tutorials/introduction/linux_gcc_cmake/linux_gcc_cmake.html)

- ▶ Can you compute the edges of an image and display it

- HINT – Canny Edge
  - [http://docs.opencv.org/2.4/doc/tutorials/imgproc/imgtrans/canny\\_detector/canny\\_detector.html](http://docs.opencv.org/2.4/doc/tutorials/imgproc/imgtrans/canny_detector/canny_detector.html)

# OpenCV – ROS

- ▶ Create a node that
  - Loads an image
  - Converts it to grayscale
  - Publishes the image on a topic
- ▶ Create a node that
  - Subscribes to the image topic
  - Computes an intensity histogram on received image
  - Displays the histogram
- ▶ HINTS
  - [http://wiki.ros.org/vision\\_opencv](http://wiki.ros.org/vision_opencv)
